VISION

contemporary shading

Vision is an innovative window blind that features two layers of translucent and opaque horizontal striped fabric. The front layer moves independently of the back allowing the stripes to glide between each other creating an open and closed effect, with limitless light control.

Sliding the fabric into a closed 'opaque-opaque' position allows full privacy and an impressive block of beautiful fabric at your window.

A single control chain is used to slide the opaque and translucent woven stripes past each other. The same chain is used to raise or lower the window blind to any height in the window with ease, in the same way the classic roller blind would. This enables you to soften excess daylight and reduce the glare entering your room.

The Vision blind will also roll up fully into the attractive cassette headrail to reveal an uninterrupted view to the outside.

VISION HEADRAIL

Our sleek cassettes give your Vision blinds a stylish enhancement. Choose either open or closed cassettes in white or black to co-ordinate or contrast with your blind and room decor. For a softer touch you might select a matching fabric headrail insert.

contemporary bold horizontal stripes effortlessly move from translucent to dim out or blackout
